Sir,

Thank you very much for your valuable mail, please note our 4 types of hydraulic operated concrete block making machines (movable type) cost and production details:

1. Jumbo 860 – hydraulic operated concrete block making machine with reduction gear box systems and high frequency vibrator powered by 4 motors and all concern accessories hydraulic motor 5hp, vibrator motor 2 nos - 0.5 hp, moving motor 0.5 hp = 2,60,000.00

Each hollow mould = 37,000.00

Each solid mould = 35,000.00

Production per stroke (per hour 50-60 cycle) 400 x 200 x 200 mm 8 per cycle per hour – 480 blocks

400 x 200 x 150 mm 10 per cycle per hour – 600blocks 400 x 200 x 100 mm 16 per cycle per hour – 1000 blocks

2. 1060 – hydraulic operated concrete blockmaking machine with reduction gear box systems and high frequency vibrator powered by 3 motors. [i.e. 0.5 hp for traction, 2 hp for vibration 5 hp for hydraulic pump] and all concern accessories = 1, 55,000.00

Each hollow mould = 20,000.00

Each solid mould = 19,000.00

Production per stroke (per hour 50-60 cycle) 400 x 200 x 200 mm 5 per cycle per hour – 300 blocks

400 x 200 x 150 mm 6 per cycle per hour – 360blocks

400 x 200 x 100 mm 10 per cycle per hour – 600 blocks

3. 860 – ghydraulic operated concrete block making machine with reduction gear box systems and high frequency vibrator powered by 3 motors [i.e 0.5 hp for traction, 1.5 hp for vibration, 3 hp for hydraulic pump] and all concern accessories = 1, 45,000.00

Each hollow mould = 18,000.00

Each solid mould = 17,000.00

Production per stroke (per hour 50-60 cycle) 400 x 200 x 200 mm 4 per cycle per hour – 240 blocks

400 x 200 x 150 mm 5 per cycle per hour – 300 blocks

400 x 200 x 100 mm 8 per cycle per hour – 480 blocks

4. Global 430 – g hydraulic operated concrete block making machine with reduction gear box systems and high frequency vibrator powered by 3 motors [i.e 0.5 hp for traction, 1.5 hp for vibration, 2 hp for hydraulic pump] and all concern accessories = 1, 25,000.00

Each hollow mould = 13,000.00

Each solid mould = 12,000.00

Production per stroke (per hour 50-60 cycle) 400 x 200 x 200 mm 2 per cycle per hour – 120 blocks

400 x 200 x 150 mm 3 per cycle per hour – 150 blocks

400 x 200 x 100 mm 4 per cycle per hour – 240 blocks

About machine: this is an egg laying hydraulic concrete block making machine

On wheels. It will lay blocks on a concrete floor and move to the next position. This process eliminates the need for wood or steel pallets. The mould and ram are moved by hydraulic cylinders, which creates a much stronger block and the block maker can use less cement. Any type of blocks can be produced with consistent quality by affixing the desired

mould. Several standard moulds are readily available. Custom moulds can be produced. This machine applies pressure of 2000 psi. This machine can be used to produce hollow block, solid blocks and bricks galore and interlocking pavers.

We await your valuable reply. If you have any other clarification / information, please feel free to contact us. We provide you with prompt and efficient service. Concrete mixer machine with 3 hp motor stand = 58,000.00 wheel barrows 2 nos with scooter tyre = 10,000.00 block shifting trolley 6 x 3 = 16000.00

Terms and conditions

- tax and transport charges extra (18 % GST)
- delivery within a week
- 100% advance with order.
- This quotation valid for one week.

Thanks & regards
